The wool shorn from single sheep.

The natural oil in sheep wool.

To wash wool free of grease and dirt.

The plant and its fiber, from which linen is made.

A wire-toothed brush used in pairs to straighten and smooth fibers such as wool and cotton in preparation for spinning.

A narrow roll of carded wool prepared for spinning.

A wooden comb with long metal teeth used to comb out flax, hemp, or jute fibers.

An implement used for spinning fiber into thread, consisting of a rotating spindle operated by a fly-wheel and treadle.

This is a device used to weave cloth. The basic purpose is to hold the warp threads under tension to facilitate the interweaving of the weft threads.
